

Support HB 259 to Expand Access to Affordable Child Care Start-Up Grants to Expand the Supply of Licensed Home-Based Child Care

Virginia has seen a steady decline in licensed home-based child care programs, or Family Day Homes, even as demand for child care continues to grow.

These programs are vital options for families who need infant and toddler care, work non-traditional hours (such as shift work or military schedules), or have children with special needs who thrive in smaller, home-like settings.

Family Day Homes allow siblings to remain together and offer safe, nurturing care in familiar neighborhoods—making them an essential part of Virginia’s child care infrastructure.

The Challenge

Virginia faces a serious child care supply gap, affecting both families and the economy.

- A 2023 JLARC [report](#) confirmed that potential demand for child care far exceeds supply statewide.
- The Buffett Early Childhood Institute ([BECI](#)) estimates the 10-year economic impact of this shortage at \$2.8–\$4.35 billion in lost productivity and revenue.
- Since 2019, the number of regulated family day homes has declined by nearly 1,000.

This shortage is most severe in rural areas and low-income communities, where families often have no access to licensed care.

POLICY RECOMMENDATION

Support HB259

Child Care Aware of Virginia urges support of legislation to create Start-Up and Improvement Grants for Family Day Homes.

This investment will:

- Increase the number of licensed home-based providers
- Expand parent choice for safe, high-quality care
- Support economic growth and job participation, and
- Strengthen Virginia's child care and early childhood system statewide

Economic and Community Impact

- Expanding home-based care creates small business opportunities, particularly for women entrepreneurs.
- This solution supports Virginia's workforce by allowing more parents to participate in the labor market.
- It aligns with existing state and federal initiatives to revitalize Opportunity Zones and strengthen local economies. In Virginia, 75% of the child care supply gap is in or near these zones. Expanding licensed home-based child care in these areas is a smart investment that supports broader efforts to improve low-income communities.
- Modest one-time grants have a large return on investment, creating sustainable small businesses and new child care slots.

The Opportunity

HB259 establishes the Home-Based Child Care Provider Start-Up Grants Pilot Program, providing funds to Child Care Aware of Virginia to expand the supply of licensed home-based child care across the Commonwealth. The program promotes safety in home-based settings and increases access to reliable child care for working parents by awarding start-up grants to both licensed and unlicensed home-based providers. Chief Patron: Delegate Shelly Simonds

Grant details:

- Start-up grants of up to \$5,000 to help individuals meet licensing requirements and open a licensed family day home.
- Improvement grants for current providers to enhance safety, quality, and compliance (e.g., fencing, stair gates, cribs, play materials, or accessibility improvements).
