HOW IT WORKS

HomeCurrencyPay processes all of the world's major currencies. It's fully automated. Your HomeCurrencyPay-enabled point-of-sale terminal does the work for you:

Step 1

Swipe the international MasterCard® or Visa® card. The system will identify the home currency and calculate the converted rate automatically.

Step 2

Receipt prints the sales amount in U.S. Dollars and the cardholder's home currency. Cardholder selects preference, signs the receipt and returns it to you.

Step 3

Merchant enters the currency selection in the terminal and completes the payment transaction. Final receipt shows the customer the U.S. Dollar purchase price, the exchange rate and the final price in the cardholder's home currency.

After the Sale: Your transaction settlement is in U.S. Dollars. Your compensation for every foreign transaction processed through HomeCurrencyPay is included in your monthly processing statement.
